Art. 73.825

Crushed Grass

Crushed Grass contains traces of vegetation and provides a perfect image of grass sticking to the wheels and tracks of the vehicle, and of grass and plants crushed and flattened by the passage of heavy armor, a very realistic detail for models, vignettes or dioramas.

by Chema Cabrero

1. This product is specially designed to reproduce the appearance of crushed grass on the tracks of a tank or the wheels of a vehicle, civilian or military use.

2. Its texture and density facilitate its application on the model or the base, using brushes or appropriate tools.

3. In this case we will apply the product on the tracks of a Panther, suggesting their pass over a wet prairie or grass zone.

4. The fresh and wet grass crushed by the vehicle weight and movement are accurately reproduced.

5. We can apply the product in several layers as we like. Also you can depict crushed grass splashes blowing air from the airbrush on a brush charged with the mixture.

6. The texture and size of grass are in proportion to the models and you can dilute or blend them using water or Vallejo Thinner.
