How to Paint Dark Angels Armor

This tutorial shows how to paint the Dark Angels armor using a combination of airbrush and brush.

For the tutorial we used the body, arms and weapon from the Kromlech company, as well as some parts from Games Workshop (head and backpack).

Jon Gómez (Pintureando.com)

- 1 The miniature is primed in black using Surface Primer Black 70.602 or Hobby Paint Spray Black 28.012.

- 2 Apply Game Air Dark Green 72.728 all over the figure with the airbrush.

- 3 Using the airbrush, apply a first highlight on the upper parts of the figure with a mixture of equal parts of Game Air Dark Green 72.728 and Game Air Sick Green 72.729.

- 4 To apply a final highlight, prepare a mixture of 1 part of Game Air Dark Green 72.728 to 2 parts of Game Air Sick Green 72.729. This final highlight is applied with the airbrush to very specific points, further reducing the area sprayed.

- 5 Apply a controlled wash using a brush, all over the miniature, with 4 drops of Game Wash Black Wash 73.201, 3 drops of Game Wash Green Wash 73.205, 6 drops of Thinner Medium 70.524 and 8 drops of Flow Improver 71.362. Thanks to the Flow Improver, the wash settles only in the nooks and crannies of the miniature. It is recommended to use another brush soaked in Flow Improver on the lighter areas of the miniature to ensure that the wash is easily removed from them.

- 6 Outline the entire armor with a brush using Model Color Uniform Green 70.922.

How to Paint Dark Angels Armor

- 7 A second outline is done on all the corners and edges of the armor, further reducing the area highlighted.

- 8 Finally, the remaining details on the figure, effects, etc., are painted. Below are 2 examples of Dark Angels painted with the same technique.
